

# SnapMail

“SnapMail performs flawlessly and is one of the easiest messaging applications to use!” -Tony Hines, KHG

## In-House messaging: Internet Not Required!

For under \$32 a user, no need for Internet access, in-house support or a server, SnapMail is already used by tens of thousands of customer to streamline interoffice communications.

Acclaimed by: MacWorld, Tucows, Version Tracker and MacHome

SnapMail is cross-platform, running on Mac OS and Windows computers, connected to a TCP/IP network.

**Ensure your office is up, even if the Internet goes down:**

Get all the benefits of e-mail, file transfer and instant messaging over your office network—without the Internet’s hassles, security risks, and delays, not to mention that with SnapMail, none of your e-mail will ever be Spam!

**Enhance In-House Communication:**

Deliver phone messages via e-mail—say goodbye to “While You Were Out” pads and lost messages! Use Snapbacks to communicate with coworkers while you or they are on the phone—no more missing important calls!

**Track Important Tasks:**

Use SnapMail to deliver reminder messages at a time and date you specify. Remind a teammate (or yourself) about important events or tasks for later today, next week, or next month. Preview your reminders at any time to see what’s on your to-do list. Remind yourself to leave for meetings, start projects, or quit work on time—let SnapMail be your secretary!

**Connect Remote offices over the Internet:**

Use SnapMail as a private messaging system to connect up your remote offices or telecommuters over the network.

Imagine your productivity gains with no more spam to contend with!
